

## Quarterly Headlines

The MSCI EM Index rose 4.7% in the fourth quarter, bringing the full-year 2025 return to +33.6%. Emerging markets outperformed developed markets over the year, delivering their strongest annual performance since 2017.

Asia's +4.5% return was driven primarily by South Korea (+27.3%), where AI leaders benefited from expectations of excess memory demand and rising prices. Taiwan (+10.4%) also outperformed on continued strength in select AI-exposed stocks. In contrast, China (-7.4%) declined as profit-taking in large-cap outperformers weighed on returns. Latin America was supported by Brazil and Mexico, plus outsized gains from the smaller regional markets. EMEA benefited from strength in South Africa and Poland, offset by the underperformance of oil-linked Saudi Arabia.

The portfolio performed in-line with the index return. Positive stock selection, particularly in Asia, was the primary contributor to investment performance. China stock selection was the largest contributor, with the portfolio's more resilient holdings outperforming amid China's market weakness. Stock selection in India also added value. These gains were partially offset by underweight positions in South Korea and Taiwan.

Stock selection in communication services and consumer discretionary supported performance, while underweight exposure to the IT and materials sector detracted.

## Strategy at a Glance

- Strategy Inception: September 2021
- Investment Team Size of 8
- Value-oriented strategy
- Detailed, long-term fundamental analysis
- Consistent application of income-oriented valuation approach
- History of outperformance versus the benchmark
- Portfolio contains 40 - 60 issuers
- Annual turnover is generally 30 - 50%

### Defensive Characteristics

## Important Notes and Disclosures

Mondrian Investment Partners Limited ("Mondrian") claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. A GIPS Report and a complete list and description of composites and/or a presentation that adheres to the GIPS standards is available on request from [mondrian.website@mondrian.com](mailto:mondrian.website@mondrian.com). Mondrian is a value-oriented manager seeking to achieve high real returns for its clients. All products utilize an income-oriented value discipline. Mondrian's methodology is applied consistently to markets and individual securities, both bonds and equities. The Emerging Markets ESG Composite includes U.S. dollar based discretionary portfolios, measured against the Morgan Stanley Capital International EM or equivalent Index net of withholding taxes. The portfolios are invested primarily in publicly traded companies based in an Emerging Market, or deriving a majority of revenue within Emerging economies. Shares may, however, be listed on more developed exchanges. Environmental, social and governance principles-based exclusions are applied to portfolio construction. The MSCI Emerging Markets Index assumes the reinvestment of dividends after the deduction of withholding tax and approximates the minimum possible dividend re-investment, unless the benchmark is specifically described as a "Gross" benchmark.

All portfolio data is based on the Mondrian Representative Account for the strategy.

Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

This Periodic Update contains supplemental information which complements the Mondrian Emerging Markets Equity ESG Composite GIPS compliant presentation. Additional information is available upon request.

A Bull Market period is defined as one in which the benchmark showed a positive return, and a Bear Market period when the benchmark showed a negative return.

Calculations for P/E, P/B, dividend yield and market caps are based on generally accepted industry standards. All Strategy characteristics are derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values for the Strategy. The details of exact calculations can be provided upon request. All characteristic data provided is produced using Mondrian's accounting system data.

Past performance is not indicative of future results. An investment involves the risk of loss. The investment return and value of investments will fluctuate. There can be no assurance that the investment objectives of the strategy will be achieved.

Performance results marked "Gross" do not reflect deduction of investment advisory fees but are net of transaction costs and withholding tax. Investment returns will be reduced accordingly. Performance returns marked "Net" reflect deduction of investment advisory fees and are calculated by deducting a quarterly indicative fee from the quarterly composite return. The indicative fee is defined as being the effective fee rate (or average weighted fee) at the composite's minimum account size. Actual net composite performance would be higher than the indicative net performance shown because some accounts have sliding fee scales and therefore lower effective fee rates.

Views expressed were current as of the date indicated, are subject to change, and may not reflect current views. Views should not be considered a recommendation to buy, hold or sell any security and should not be relied on as research or investment advice. This Periodic Update may include forward-looking statements. All statements other than statements of historical facts are forward-looking statements (including words such as "believe," "estimate," "anticipate," "may," "will," "should," "expect"). Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Various factors could cause actual results or performance to differ materially from those reflected in such forward-looking statements.
