

Quarterly Headlines

International equity markets continued to rally in the second quarter. The US dollar weakened on concerns over the US fiscal deficit and expectations of a more dovish Federal Reserve, as economic growth shows signs of slowing. Markets recovered from initial volatility in April following President Trump's Liberation Day tariffs, as expectations grew that the final US tariffs would be lower than feared. Growth stocks led returns, particularly within IT and industrials, as semiconductor names rallied with the reversal of Biden-era export restrictions and rising enthusiasm for AI technologies.

The portfolio delivered strong absolute returns and outperformed the benchmark. Year-to-date returns also remain firmly ahead of the market.

Relative returns were driven by strong stock selection in the consumer staples sector. Sainsbury's, the UK food retailer, rallied after reporting robust full-year results with a stronger-than-expected outlook over the coming year. MatsukiyoCocokara, the Japanese drugstore operator, outperformed on solid results, an increase in its dividend, and long-term guidance which incorporates margins exceeding market expectations. This was partially offset by stock selection in the health care sector where Sanofi, the French pharmaceutical company, lagged due to minor pipeline disappointments and broader sector weakness following an executive order targeting lower drug prices in the US.

Strategy at a Glance

- Strategy Inception: July 2016
- Investment Team Size of 10
- Active, value-oriented defensive strategy
- Detailed, long-term fundamental analysis
- Consistent application of income-oriented valuation approach
- Portfolio contains 40 - 60 developed market issuers
- Annual turnover is generally 10 - 20%

Important Notes and Disclosures

Mondrian Investment Partners Limited ("Mondrian") claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. A GIPS Report and a complete list and description of composites and/or a presentation that adheres to the GIPS standards is available on request from mondrian.website@mondrian.com. Mondrian is a value-oriented defensive manager seeking to achieve high real returns for its clients. All products utilize an income-oriented value discipline. Mondrian's methodology is applied consistently to markets and individual securities, both bonds and equities. The International Equity ESG Composite includes U.S. dollar based discretionary portfolios, measured against the Morgan Stanley Capital International EAFE or equivalent Index net of withholding taxes. The portfolios invest in non-U.S. equities with discretion to invest in countries outside the index including Emerging Market countries, with an allowance for hedging. Environmental, social and governance principles-based exclusions are applied to portfolio construction. The International Equity Composite includes U.S. dollar based discretionary portfolios, measured against the Morgan Stanley Capital International EAFE or equivalent Index net of withholding taxes. The portfolios invest in non-U.S. equities with discretion to invest in countries outside the index including Emerging Market countries, with an allowance for hedging. Effective 1 January 2021, the International Equity Composite was redefined to include limited partnership portfolios and portfolios with hedging restrictions in the composite. The MSCI EAFE Index assumes the reinvestment of dividends after the deduction of withholding tax and approximates the minimum possible dividend re-investment, unless the benchmark is specifically described as a "Gross" benchmark.

All portfolio data is based on the Mondrian Representative Account for the strategy.

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

This Periodic Update contains supplemental information which complements the Mondrian International Equity ESG Composite and International Equity Value Opportunities Composite GIPS compliant presentation. Additional information is available upon request.

A Bull Market period is defined as one in which the benchmark showed a positive return, and a Bear Market period when the benchmark showed a negative return.

Calculations for P/E, P/B, dividend yield and market caps are based on generally accepted industry standards. All Strategy characteristics are derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values for the Strategy. The details of exact calculations can be provided upon request. All characteristic data provided is produced using

Past performance is not indicative of future results. An investment involves the risk of loss. The investment return and value of investments will fluctuate. There can be no assurance that the investment objectives of the strategy will be achieved.

Performance results marked "Gross" do not reflect deduction of investment advisory fees but are net of transaction costs and withholding tax. Investment returns will be reduced accordingly. Performance returns marked "Net" reflect deduction of investment advisory fees and are calculated by deducting a quarterly indicative fee from the quarterly composite return. The indicative fee is defined as being the effective fee rate (or average weighted fee) at the composite's minimum account size. Actual net composite performance would be higher than the indicative net performance shown because some accounts have sliding fee scales and therefore lower effective fee rates.

Views expressed were current as of the date indicated, are subject to change, and may not reflect current views. Views should not be considered a recommendation to buy, hold or sell any security and should not be relied on as research or investment advice. This Periodic Update may include forward-looking statements. All statements other than statements of historical facts are forward-looking statements (including words such as "believe," "estimate," "anticipate," "may," "will," "should," "expect"). Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Various factors could cause actual results or performance to differ materially from those reflected in such forward-looking statements.
