

## Quarterly Headlines

The US equity market delivered modest gains in a volatile first quarter. Markets began the year on a strong footing, supported by resilient economic data and continued enthusiasm around AI-driven investment, but sentiment weakened as geopolitical risks intensified. Escalating tensions in the Middle East, leading to military conflict involving Iran, drove a sharp rise in oil and gas prices and contributed to periods of market weakness. Against this backdrop, leadership rotated toward more defensive and asset-heavy areas of the market, with the energy sector the strongest performer as supply concerns drove commodity prices higher.

The portfolio underperformed the benchmark over the quarter, with relative returns held back by stock selection in the health care and IT sectors. ICON was the main detractor, reflecting continued pressure on clinical research activity and a more cautious outlook from pharmaceutical and biotech clients, which weighed on earnings expectations. Salesforce was also weak as software stocks sold off amid investor concern that AI could structurally disrupt incumbent business models.

## Strategy at a Glance

- Strategy Inception: January 2006
- Investment Team Size of 7
- Value-oriented strategy
- Detailed, long-term fundamental analysis
- Consistent application of income-oriented valuation approach
- History of outperformance versus the benchmark, with lower volatility
- Portfolio contains 25 - 35 issuers
- Annual turnover is generally 20 - 35%

### Defensive Characteristics

## Important Notes and Disclosures

Mondrian Investment Partners Limited ("Mondrian") claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. A GIPS Report and a complete list and description of composites and/or a presentation that adheres to the GIPS standards is available on request from [mondrian.website@mondrian.com](mailto:mondrian.website@mondrian.com). Mondrian is a value-oriented manager seeking to achieve high real returns for its clients. All products utilize an income-oriented value discipline. Mondrian's methodology is applied consistently to markets and individual securities, both bonds and equities. The U.S. Large Cap Equity Composite (formerly known as The U.S. Equity Composite) includes U.S. dollar based discretionary portfolios, measured against the Russell 1000 Value or equivalent Index. The portfolios are primarily invested in U.S.-listed equities with discretion to invest in countries outside the index, with an allowance for hedging. The Russell 1000 Value Index (Gross) Index assumes the reinvestment of dividends after the deduction of withholding tax and approximates the minimum possible dividend re-investment, unless the benchmark is specifically described as a "Gross" benchmark.

All portfolio data is based on the Mondrian Representative Account for the strategy.

Neither Russell nor any other party involved in or related to compiling, computing or creating the Russell data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall Russell, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits even if notified of the possibility of such damages). No further distribution or dissemination of the Russell data is permitted without Russell's express written consent.

This Periodic Update contains supplemental information which complements the Mondrian U.S. Large Cap Equity Composite GIPS compliant presentation. Additional information is available upon request.

A Bull Market period is defined as one in which the benchmark showed a positive return, and a Bear Market period when the benchmark showed a negative return.

Calculations for P/E, P/B, dividend yield and market caps are based on generally accepted industry standards. All Strategy characteristics are derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values for the Strategy. The details of exact calculations can be provided upon request. All characteristic data provided is produced using Mondrian's accounting system data.

Past performance is not indicative of future results. An investment involves the risk of loss. The investment return and value of investments will fluctuate. There can be no assurance that the investment objectives of the strategy will be achieved.

Performance results marked "Gross" do not reflect deduction of investment advisory fees but are net of transaction costs and withholding tax. Investment returns will be reduced accordingly. Performance returns marked "Net" reflect deduction of investment advisory fees and are calculated by deducting a quarterly indicative fee from the quarterly composite return. The indicative fee is defined as being the effective fee rate (or average weighted fee) at the composite's minimum account size. Actual net composite performance would be higher than the indicative net performance shown because some accounts have sliding fee scales and therefore lower effective fee rates.

Views expressed were current as of the date indicated, are subject to change, and may not reflect current views. Views should not be considered a recommendation to buy, hold or sell any security and should not be relied on as research or investment advice. This Periodic Update may include forward-looking statements. All statements other than statements of historical facts are forward-looking statements (including words such as "believe," "estimate," "anticipate," "may," "will," "should," "expect"). Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Various factors could cause actual results or performance to differ materially from those reflected in such forward-looking statements.
