

## Quarterly Headlines

International equity markets rose further in the first quarter, continuing their strong performance from last year. Cyclically sensitive sectors led returns supported by economic resilience, growing anticipation of US interest rate cuts and general AI euphoria. The IT sector was the standout sector in the quarter, while the more defensive utilities and consumer staples sectors lagged in a risk-on market environment. The Hong Kong equity market also continued to lag on ongoing issues in the property sector and weak macroeconomic data. Strong local currency returns were held back by US dollar strength during the quarter.

The Fund delivered positive absolute returns in the first quarter, though consistent with our investment approach, lagged a very robust market.

## Performance Summary

	Fund (Net)	Benchmark	Secondary Benchmark
Quarter 1, 2024	2.13%	5.78%	4.48%
1 Year	12.06%	15.32%	17.32%
3 Years (Annualized)	4.36%	4.78%	6.59%
5 Years (Annualized)	4.75%	7.33%	6.39%
10 Years (Annualized)	3.21%	4.80%	3.49%
Since Inception (Annualized) February 4, 1992	6.76%	5.60%	N/A

*The performance data quoted represents past performance. Past performance is no guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than performance quoted. For performance data current to the most recent month end, please call 888-832-4386. NAV returns since inception of February 4, 1992 when the Fund was the Delaware Pooled Trust International Equity Fund. The Fund was reorganized into the Mondrian International Equity Fund on March 14, 2016. It continues to be managed in the same way. The returns prior to the inception date of the MSCI EAFE Value Index (December 8, 1997) cannot be provided as data is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed).*

## Important Notes and Disclosures

To determine if the Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk and charges and expensive. This and other information can be found in the funds full and summary prospectus which can be obtained by calling 888-832-486 or by visiting [www.mondrian.com/mutual](http://www.mondrian.com/mutual) funds. Please read the prospectus carefully before investing. The Mondrian Investment Partners Limited Funds are distributed by SEI Investment Distribution Co. (SIDCO). SIDCO is not affiliated with the advisor, Mondrian Investment Partners Limited.

Investing involves risk, including the possible loss of principal. International investments entail risks not ordinarily associated with U.S. investments including fluctuation in currency values, differences in accounting principles, or economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. The Fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses.

MSCI EAFE - The MSCI EAFE Index (Europe, Australasia, Far East) is a free float adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US and Canada. Index returns are shown with net dividends reinvested. MSCI EAFE Value - The MSCI EAFE Value Index captures large and mid cap securities exhibiting overall value style characteristics across Developed Markets countries around the world, excluding the US and Canada. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. Indices are unmanaged and do not include the effect of fees. One cannot invest directly in an index.

Weighted Average Price to Earnings - The Price to Earnings Ratio is a stock's current price divided by the company's trailing 12-month earnings per share from continuous operations. Weighted Average Price to Book - The Price to Book Ratio links the stock/share price of a company with the book or accounting value of shareholders' equity per share. Weighted Average Market Cap - The portfolio-weighted average market capitalizations of all equity securities. Median Market Cap - The midpoint of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in a portfolio.

© 2023 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life sub accounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Mondrian International Value Equity Fund was rated against the following numbers of U.S.-domiciled Foreign Large Value funds over the following time periods: 338 funds in the last three years, 316 funds in the last five years and 205 funds in the last ten years. With respect to these Foreign Large Value funds, the Mondrian International Value Equity Fund received a Morningstar Rating of 3 stars, 2 stars and 3 stars for the three, five and ten-year periods, respectively. Past performance is no guarantee of future results.

Calculations for P/E, P/B, sector country allocations and market caps are based on generally accepted industry standards. All Fund characteristics are derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values for the Fund. The details of exact calculations can be provided on request. All characteristic data provided is produced using Mondrian's accounting system data.

A Bull Market period is defined as one in which the benchmark showed a positive return, and a Bear Market period when the benchmark showed a negative return. CPI (Consumer Price Index) is a price index, the price of a weighted average market basket of consumer goods and services purchased by households.

Attribution information is calculated using Mondrian's accounting system data and not official Net Asset Value data of the Fund. Therefore, timing of the accounting of Administrative Expenses and pricing for securities may differ from official Net Asset Value data. Attribution is based on the return of the Fund's holdings gross of management fees and other expenses and before any fund fair valuation.

Figures presented as gross are net of commissions and other direct expenses but before advisory fees, custody charges, withholding taxes, and other indirect expenses, and include reinvestment of dividends and other earnings. Actual returns will be reduced by such fees and expenses. Figures presented as net differ from those marked as gross in that they reflect the deduction of investment advisory fees. Such fees are calculated by deducting the appropriate portion of the estimated quarterly fee from the monthly return.

Views expressed were current as of the date indicated, are subject to change, and may not reflect current views. Views should not be considered a recommendation to buy, hold or sell any security and should not be relied on as research or investment advice. This Periodic Update may include forward-looking statements. All statements other than statements of historical facts are forward-looking statements (including words such as "believe," "estimate," "anticipate," "may," "will," "should," "expect"). Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Various factors could cause actual results or performance to differ materially from those reflected in such forward-looking statements.
