WHAT IS THIS PRODUCT?

Type

This is an investment fund established as a company with variable capital and segregated liability between sub-funds, incorporated with limited liability under the laws of Ireland.

Objectives

Investment objective The objective of the Fund is to achieve long-term total return.

Investment policies The Fund seeks to achieve its investment objective primarily by investing in China A-share securities, where, in the Investment Manager's opinion, securities are undervalued at the time of purchase based on fundamental value analysis. The Fund shall invest at least 70% in China A-share securities.

The Fund may also invest in currency, debt securities, equity related securities, collective investment schemes and hold cash positions, as further outlined below.

A-share securities are securities that are listed or traded on an exchange located in China, specifically the Shanghai Stock Exchange ("SSE") and the Shenzhen Stock Exchange ("SZSE") and are denominated in Renminbi ("China A-shares"). The Fund expects to invest in China A-shares through the Shanghai-Hong Kong Stock Connect program, the Shenzhen-Hong Kong Stock Connect program and indirectly through market access products (such as participation notes).

The Fund may invest in securities issued in any currency and may hold foreign currency. Securities of issuers within a given country may be denominated in the currency of another country or in multinational currency units, including the Euro. The Investment Manager primarily uses a purchasing power parity approach to evaluate currency risk.

Under normal circumstances, no more than 10% of the Fund's assets will be invested in debt securities issued by governments or by their agencies, instrumentalities or political subdivisions, or by corporate entities, all of which may be high-yield, high-risk fixed income securities rated no lower than BBB by S&P and Baa by Moody's or, if unrated, considered by the Investment Manager to be of equivalent quality. In addition, for temporary defensive purposes, the Fund may invest in high-quality debt instruments.

Furthermore, the Fund may invest in equity related securities in circumstances where direct exposure to securities is uneconomic, impractical or not possible. Equity related securities include: convertible preferred shares (being preferred shares that include an option to convert the preferred shares into a fixed number of common shares, usually any time after a predetermined date); warrants (being a derivative security that gives the holder the right to purchase securities (usually equity) from the issuer at a specific price within a certain time frame); securities of issuers directly or

indirectly in the form of Global Depository Receipts (GDRs), American Depository receipts (ADRs), International depository receipts (IDRs) and European depository receipts (EDRs).

The Fund may invest up to 10% of Net Asset Value in the units/shares of eligible collective investment schemes where such investments satisfy the requirements of the Central Bank (including ETFs).

Benchmark uses This Sub-Fund is actively managed and refers to the MSCI China A Onshore Index USD for performance comparison. The Sub-Fund's investment strategy is not constrained by the benchmark constituents.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class may declare a dividend on a monthly basis and, if so, it will be paid within two calendar weeks of the declaration date.

Launch date The Fund is not launched yet.

Fund Currency The base currency of the Fund is USD.

Switching You can place orders to buy, switch or redeem shares of this fund by contacting your adviser or distributor, or your national representative.

Asset Segregation The assets and the liabilities of each sub-fund are segregated by law.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the Board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIPs manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Practical information

Depository The fund depository is Northern Trust Fiduciary Services (Ireland) Limited.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 October 2017 and 31 October 2022.

Moderate: this type of scenario occurred for an investment between 30 November 2019 and 30 November 2024.

Favourable: this type of scenario occurred for an investment between 29 February 2016 and 28 February 2021.

WHAT HAPPENS IF WAYSTONE MANAGEMENT COMPANY (IE) LIMITED IS UNABLE TO PAY OUT?

The Management Company of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	97 USD	564 USD
Annual cost impact*	1.0%	1.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.8% before costs and -0.1% after costs.

Composition of costs
