

## Quarterly Headlines

The MSCI Emerging Markets Small Cap Index was up strongly over the quarter. Latin America was the best performing region due to an improving macroeconomic backdrop in both Mexico and Brazil. Asia was broadly in line with the index, with Taiwan and India delivering strong returns. India's stable political landscape and robust economic outlook, amidst concerns of a global slowdown, continued to attract inflows from domestic and foreign institutional investors. In Taiwan, the Information Technology sector strengthened due to investor enthusiasm around artificial intelligence. The European, Middle East and Africa region significantly underperformed the broader market. Poland was notably strong, however, continued weakness in Turkey held back the region.

The Emerging Markets Small Cap Fund gained 6.5% during the quarter but was unable to fully keep up with strongly rising markets, lagging the index by 2.2%. Negative contributions came from the portfolio's stock selection in India and positioning in Brazil. This was partially offset by the portfolio's lack of exposure to the weak Turkish market as well as positioning in Thailand.

For the full year 2023, the MSCI Emerging Markets Small Cap Index observed strong gains, rising 23.9%. The Emerging Markets Small Cap Fund provided significant upside capture during the year, gaining 25.4%, outperforming the index by 1.2%.

## Strategy at a Glance

- Strategy Inception: November 2011
- Investment Team Size of 5
- Active, value-oriented defensive strategy
- Detailed, long-term fundamental analysis
- Consistent application of income-oriented valuation approach
- History of outperformance versus the benchmark, with lower volatility
- Portfolio contains 70 - 120 securities
- Annual turnover is generally 30 - 50%

### Defensive Characteristics

## Important Notes and Disclosures

Mondrian claims compliance with the Global Investment Performance Standards (GIPS®). Mondrian is a value-oriented defensive manager seeking to achieve high real returns for its clients. All products utilize an income-oriented value discipline. Mondrian's methodology is applied consistently to markets and individual securities, both bonds and equities. The Emerging Markets Small Cap Equity Composite includes US dollar based discretionary fee paying portfolios, measured against the MSCI EM SC net of US withholding taxes. The portfolios are invested in non-US based equities with the allowance for hedging. The MSCI EM SC Index assumes the reinvestment of dividends after the deduction of withholding tax and approximates the minimum possible dividend re-investment, unless the benchmark is specifically described as a "Gross" benchmark. To receive a complete list and description of composites and/or a presentation that adheres to the GIPS standards, contact Mondrian Investment Partners (U.S.), Inc at 215-825-4500.

Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

This Periodic Update contains supplemental information which complements the Mondrian Emerging Markets Small Cap Equity Composite GIPS compliant presentation. Additional information is available upon request.

A Bull Market period is defined as one in which the benchmark showed a positive return, and a Bear Market period when the benchmark showed a negative return.

Calculations for P/E, P/B, dividend yield and market caps are based on generally accepted industry standards. All Strategy characteristics are derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values for the Strategy. The details of exact calculations can be provided upon request. All characteristic data provided is produced using Mondrian's accounting system data.

Past performance is not indicative of future results. An investment involves the risk of loss. The investment return and value of investments will fluctuate. There can be no assurance that the investment objectives of the strategy will be achieved.

Performance results marked "Gross" do not reflect deduction of investment advisory fees but are net of transaction costs and withholding tax. Investment returns will be reduced accordingly. Performance returns marked "Net" reflect deduction of investment advisory fees and are calculated by deducting a quarterly indicative fee from the quarterly composite return. The indicative fee is defined as being the effective fee rate (or average weighted fee) at the composite's minimum account size. Actual net composite performance would be higher than the indicative net performance shown because some accounts have sliding fee scales and therefore lower effective fee rates.

Views expressed were current as of the date indicated, are subject to change, and may not reflect current views. Views should not be considered a recommendation to buy, hold or sell any security and should not be relied on as research or investment advice. This Periodic Update may include forward-looking statements. All statements other than statements of historical facts are forward-looking statements (including words such as "believe," "estimate," "anticipate," "may," "will," "should," "expect"). Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Various factors could cause actual results or performance to differ materially from those reflected in such forward-looking statements.
