

Quarterly Headlines

International equity markets rallied in a volatile first quarter, materially outperforming the US market as concerns mounted over uncertainty and the impact of tariffs on the US economy, as well as the lofty valuations of some US tech companies. International currencies benefited from broad-based gains as the US dollar weakened on a softer economic outlook. European markets led returns, driven by a large fiscal stimulus package in Germany worth up to €1trn over 12 years, focused on defense and infrastructure. European financials rose sharply, supported by strong earnings and shareholder returns coupled with an improved economic outlook for the region.

The portfolio delivered strong absolute returns and outperformed the benchmark. Outperformance was driven by strong stock selection in the financials sector. Banco Santander and Lloyds Bank, the Spanish and UK banks respectively, both rose sharply as strong earnings and strong capital generation drove a step up in shareholder returns. Strong stock selection in the industrials sector also added to relative returns as Bouygues, the French conglomerate, performed well, supported by continued profit margin expansion in their energy services division, Equans, their largest business segment.

The portfolio's defensive positioning also contributed to positive relative returns, benefitting from overweight positions in the strong utilities and consumer staples sectors and an underweight position in the weak IT sector.

Strategy at a Glance

- Strategy Inception: October 2000
- Investment Team Size of 10
- Active, value-oriented defensive strategy
- Detailed, long-term fundamental analysis
- Consistent application of income-oriented valuation approach
- History of outperformance versus the benchmark, with lower volatility
- Portfolio contains 30 - 40 developed market issuers
- Annual turnover is generally 10 - 20%

Defensive Characteristics

Important Notes and Disclosures

Mondrian Investment Partners Limited ("Mondrian") claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. A GIPS Report and a complete list and description of composites and/or a presentation that adheres to the GIPS standards is available on request from mondrian.website@mondrian.com. Mondrian is a value-oriented defensive manager seeking to achieve high real returns for its clients. All products utilize an income-oriented value discipline. Mondrian's methodology is applied consistently to markets and individual securities, both bonds and equities. The International Equity Value Composite (formally the Focused International Equity Composite) includes U.S. dollar based discretionary portfolios, measured against the Morgan Stanley Capital International EAFE or equivalent index net of withholding taxes. The portfolios invest in non-U.S. based equities with discretion to invest in countries outside the index including Emerging Market countries, with an allowance for hedging. Portfolios have holding restrictions based on number of securities and market capitalisation. The MSCI EAFE Index assumes the reinvestment of dividends after the deduction of withholding tax and approximates the minimum possible dividend re-investment, unless the benchmark is specifically described as a "Gross" benchmark.

All portfolio data is based on the Mondrian Representative Account for the strategy.

Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

This Periodic Update contains supplemental information which complements the Mondrian International Equity Value Composite GIPS compliant presentation. Additional information is available upon request.

A Bull Market period is defined as one in which the benchmark showed a positive return, and a Bear Market period when the benchmark showed a negative return.

Calculations for P/E, P/B, dividend yield and market caps are based on generally accepted industry standards. All Strategy characteristics are derived by first calculating the characteristics for each security, and then calculating the weighted-average of these values for the Strategy. The details of exact calculations can be provided upon request. All characteristic data provided is produced using Mondrian's accounting system data.

Past performance is not indicative of future results. An investment involves the risk of loss. The investment return and value of investments will fluctuate. There can be no assurance that the investment objectives of the strategy will be achieved.

Performance results marked "Gross" do not reflect deduction of investment advisory fees but are net of transaction costs and withholding tax. Investment returns will be reduced accordingly. Performance returns marked "Net" reflect deduction of investment advisory fees and are calculated by deducting a quarterly indicative fee from the quarterly composite return. The indicative fee is defined as being the effective fee rate (or average weighted fee) at the composite's minimum account size. Actual net composite performance would be higher than the indicative net performance shown because some accounts have sliding fee scales and therefore lower effective fee rates.

Views expressed were current as of the date indicated, are subject to change, and may not reflect current views. Views should not be considered a recommendation to buy, hold or sell any security and should not be relied on as research or investment advice. This Periodic Update may include forward-looking statements. All statements other than statements of historical facts are forward-looking statements (including words such as "believe," "estimate," "anticipate," "may," "will," "should," "expect"). Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct. Various factors could cause actual results or performance to differ materially from those reflected in such forward-looking statements.

This material is for informational purposes only and is not an offer or solicitation with respect to any securities. Any offer of securities can only be made by written offering materials, which are available solely upon request, on an exclusively private basis and only to qualified financially sophisticated investors. The information set forth herein is a summary only and does not set forth all of the risks associated with the investment strategy described herein.

For institutional investors and professional financial advisers only.

It should not be assumed that investments made in the future will be profitable or will equal the performance of any security referenced in this piece. Examples of securities bought or sold may not represent a complete list of all transactions in the period. Holdings are subject to change.
